FOR IMMEDIATE RELEASE

Megan Miller, DVM, Joins ANIMART Professional Services Team

Beaver Dam, WI – ANIMART, LLC is pleased to announce the recent addition of Megan Miller, DVM, to their Professional Services Team. She will work together with other ANIMART Northeast team members to provide comprehensive animal health solutions to dairy producers in New York State.

Like most who pursue an agricultural career, Dr. Miller grew up in farming. Summers as a kid were spent helping her dad and grandparents on the family's Canandaigua, New York dairy farm where her passion for working with animals was born.

In high school, with the help of a few teachers, she discovered a love for biology. In 2003 she graduated from the University of Massachusetts – Amherst with a Bachelor of Science in Departmental Honors Biology. It was after earning her undergraduate degree that she decided to pair her love for biology with her passion for animals, and it was her family's roots which led her to focus on bovine medicine. She attended the University of Wisconsin – Madison, School of Veterinary Medicine, completing her studies in 2009.

Dr. Miller worked in Wisconsin for a short time before returning to New York to be closer to her family. Once back in her home state, she joined a busy mixed-animal practice, where she spent most of her time on dairy farms.

After taking a few years off to attend to her growing family, she's excited not only to return to working with animals, but also to join the ANIMART team.

"From my time working in Wisconsin, I was familiar with ANIMART. When I learned they were searching for veterinary support in New York, I was excited to explore the possibility. I have a passion for educating farmers on keeping their herds healthy. I look forward to bringing the services and education ANIMART provides to producers into the New York area."

"As we continue to make our professional services available to our ANIMART Northeast customers, having recently launched several on-farm educational initiatives, we're excited to partner with a passionate and experienced veterinarian like Dr. Miller," said Dan Ellsworth, ANIMART President & CEO. "We look forward to the value she will bring to producers in New York."

Established in 1982 and headquartered in Beaver Dam, Wis., ANIMART, LLC is a provider of animal health products, supplies and services for dairy and livestock producers worldwide. ANIMART is committed to offering a full-line of products supported by outstanding service. More information about the company and its products can be accessed at www.animart.com.
